FAUSTINI FAMILY TRADITION

Falegnameria Faustini was set up in 1850 in a rural world, at once harsh and generous, and the family changed its name to “Tisler”, a dialect term from the German “Tischler” (carpenter). Four generations later, the company’s activities are still going strong, with the same passion, rooted in the territory but addressing new needs.

Four generations later, it’s still based on the family’s integrity and its respect for those who choose to go to them for their needs.

Faedo, Trentino, 1980.

**Wooden objects

and passion,
since 1850**

OBJECTS THAT RESPECT NATURE AND MANKIND

Sustainable Italian craft production for objects to be proud of

Every article is the fruit of a number of important artisanal actions, well thought out and calculated, from the raw materials and to the beautifully finished end product.

We only buy and work material that’s PEFC certified, to guarantee it comes from sustainable forest assets. We use finishing products without formaldehyde or solvents and rigorously apply standards (EN71 and DIN53160) that prohibit the use of heavy metals and other harmful substances and require resistance to sweat and saliva.

It’s only with respect for nature and its guests that we can hope in a better life for all of us.

A new image of children and natural learning

At the beginning of the last century, Maria Montessori began to observe children and their interaction in an environment and climate favourable to learning. She understood how they autonomously and spontaneously choose the materials put at their disposal and work with them. She was able to scientifically show how children left to themselves to organize their activities in an environment designed for their needs are in the best position to learn and exercise the skills necessary for fully developing their personality. This was the beginning of the Montessori method, used because of its efficacy and completeness in educational facilities, from nurseries to high schools, in Italy and worldwide. It's the method that enabled full development of illustrious minds like Bezos, Page and Marquez.

What is nowadays defined as the “Montessori method” was seen by its creator as a “help in life” rather than a “method”. She believed that it supported children’s development and that this definition came closer to the particular function she attributed to teaching as a process of strengthening and valorization of infants’ resources.

A life spent serving the growth of society and culture, first in Italy and then abroad, before and during the 2nd world war, a period in which the Opera Nazionale Montessori, of which she was honorary president, was closed. A life and a method that brought light and progress for humanity, as shown by the success stories linked to her name.

PRODUCTION: VALUE ADDED FOR THE TEACHING OF VALUES

Produced entirely in Trentino, Italy

Montessori BF is proud to produce the materials that it sells.

This is because every single component is quality controlled and assembled in its own workshop, where a sole objective has been pursued for 170 years: quality. Montessori BF was set up in Trentino and has drawn on the heritage and experience of Trentino to give its customers a product that is “zero km” in every one of its components, the fruit of one of the greenest territories in Europe, where honesty, passion and respect are people’s key values both at work and at home.

WOOD: THE RIGHT MATERIAL FOR A BETTER EDUCATION

Solid wood or plywood, not plastic or MDF, the beads are wood and some are glass.

Modern technologies have led to widespread use of plastics and adhesives in the field of wooden products too. Materials like polyethylene, polypropylene and ABS fill our homes and schools. There are also objects made basically of wood but containing glues and other substances used to heighten performance and thereby reduce the use of the expensive raw material. So we see objects in MDF, chipboard or similar.

Montessori BF believes in the use of solid wood, a noble material and a symbol of nature and health. It learnt to use and work it 170 years ago and has handed down its knowledge and experience from generation to generation.

When we put an object into a child’s hands, we ought to ask ourselves whether this instrument for growth we’re giving the little creature in front of us is also a healthy object.

This is the thinking that underpins our objects, made almost entirely of solid wood, the beads of chains are not plastic but treated wood or glass, as in the case of gold beads.

FINISHES: QUALITY THAT CAN BE SEEN, TOUCHED AND EXPERIENCED

Non-painted treated wood, finished with products certified for use with food

Montessori BF materials stand out from the rest of the market because we insist on using natural, eco-friendly and sustainable finishes.

This means there is no painting or lacquering, except in specific cases; wood is treated with certified food grade products and finished with painting safe for children.

All this to provide products that are qualitatively flawless and healthy, ensuring the best education is delivered with the best possible materials.

Montessori BF has always sought out the best for its customers, from both an educational and qualitative point of view. It has always had the support of Montessori Method experts and wood finishing specialists, so it works to extremely high production standards and continues to improve its products.

Materials in original colours

Our materials faithfully embody the Montessori tradition and its founding principles.

Long in-depth studies by Montessori BF, the very people who materially produce the objects, consulting from Opera Montessoriana experts and ongoing tests and research have made it possible to produce materials whose colouring is totally in line with the authentic specifications of Maria Montessori herself.

Montessori BF does not buy and resell materials produced by contractors: Montessori BF invests every day in its own production quality and workshop to respect and innovate tradition with the colours that have written the history of a method of teaching and growing that is revolutionary and innovative in its simplicity.

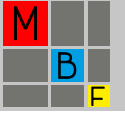

PRODUCTION: REDISCOVERING THE ORIGINAL RULES

Production to Maria Montessori's original guidelines

Montessori BF owes its success to its continual quest for product perfection, in-depth study by the company's owners and consulting from experts such as Maria Grazia Silvestri, psychomotor specialist and educator at Opera Nazionale Montessori. It has thus been possible over the years to offer materials with shapes and colours analogous to the originals, much to the satisfaction of schools and parents.

The following are examples of how details can make the difference:

- adoption of blue rods (size 3×3) for use with the pink tower, the brown stairs and the trinomial cube;
- introduction of a pocket for cards in the grammar boxes;
- production of pale pink version of the pink tower;
- spindle box split into two;
- adoption of the original Maria Montessori method for engraved letters and numbers facilitating pre writing preparation;
- use of blue and yellow in metal insets;
- division in 3 of the reading analysis boxes;
- decision to provide the decimal fraction board with thin felt;
- lining of the checker board with carpet, not just painted;
- introduction of glass for the long division tubes;
- re-introduction of the 4th color tablets box;
- making a red outlines on the leaves in botany and production of a flower-leaf-tree without a background;
- enabling the maps in the geography material to be written through because there's no background under the maps;
- re-introduction of the open filing cabinets for nomenclature, as they originally were;
- dimensional studies for child-sized drawer units;
- choice of plain color for dressing frames.

CLOTHES PEGS ACTIVITY

First indirect activity of pre-writing and thumb-index finger grip.

He trains the hand gesture and coordinates its movement.

Code: MZE-0043

OBJECT PERMANENCE BOX WITH WITH 5 SETS

Wooden box for posting with 5 different lids, each with its own group of elements to insert. Designed with a simple opening and easily usable by the small child, allowing to practice and repeat the “open-empty-close-fill” sequence. First activities of manual eye coordination and organization of a repeating sequence.

Code: MZE-0037

INTERLOCKING GEOMETRIC SHAPE: THREE IDENTICAL CYLINDERS

Wooden tray with three identical cylinders. Material that needs no introduction that guides the child to repeat a simple sequence.

Code: MZE-0038

INTERLOCKING GEOMETRIC SHAPE: THREE DIFFERENT CYLINDERS

Wooden tray with three cylinders of different diameters, but the same height. Material that needs no introduction that guides the child to order different dimensions of the same shape in a short sequence.

WOODEN EGG AND CUP

Egg with egg cup.
Putting and removing an egg from an egg holder is an activity that can be experienced by an 8-9 month old baby.

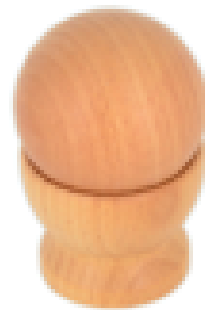

Code: MZE-0041

WOODEN SPHERE AND CUP

Sphere with egg cup.
Putting and removing a sphere in an egg holder is an activity that can be experienced by an 8-9 month old baby.

Code: MZE-0042

TABLET OF FRACTIONS

The child will be able to compose and reassemble the tablet according to countless possibilities without the need for instructions or explanations. An exercise on shapes and sizes that contains the modality of self-correction. Suitable for the zero-three year age group, but also suitable for the older ones.

Code: MZE-0044

BRAIDING BOARD

This material is ideal for exercising fine motor skills. It consists of three different colored cords anchored to a wooden board, helping the child to learn to weave.

Code: MZE-0050

DRESSING FRAME: LARGE BUTTONS

This version of Montessori dressing is specifically aimed at the zero-three year age group. It follows the pedagogical principle for which the development of a basic skill at the simplest level is proposed to then become more complex in the following phases.

The materials are larger than the ones that follow and the number of fastenings is reduced.

Dimensions: external measure 30 x30 cm

Code: MZE-0045

DRESSING FRAME: PRESS STUDS

This version of Montessori dressing is specifically aimed at the zero-three year age group. It follows the pedagogical principle for which the development of a basic skill at the simplest level is proposed to then become more complex in the following phases.

The materials are larger than the ones that follow and the number of fastenings is reduced.

Dimensions: external measure 30 x30 cm

Code: MZE-0046

DRESSING FRAME: ZIPPER

This version of Montessori dressing is specifically aimed at the zero-three year age group. It follows the pedagogical principle for which the development of a basic skill at the simplest level is proposed to then become more complex in the following phases.

The materials are larger than the ones that follow and the number of fastenings is reduced.

PIKLER TRIANGLE (TRIANGULAR STRUCTURE)

Triangular structure in beech wood to which the slide/ladder is associated. Children can exploit the triangle by climbing, using the platform or in other ways, as their imagination suggests. Invite the children to move freely in the space to promote physical development, but also relational and emotional development.

Dimensions: 70x70x70 cm

Code: MZE-0060

PIKLER TRIANGLE (SLIDE)

Beech wood platform to be used with the Pikler Triangle: slide on one side, ladder on the other.
Maximum load 40 kg.

Dimensions: 125 x 40 cm

Code: MZE-0061

DOLL WASHING STATION

Washing the doll is not simulated, but can actually be done with soap and water. It is an exercise capable of transmitting both the sequence of how the washing process is carried out, and trains the hands and gestures to a remarkable coordination and ability. Much space is allowed for the development of the concept of care.

The structure is designed to contain any water leaks and therefore make the activity more practicable in the section. The spaces are large and well defined in order to absorb the first basic concepts. The simple structure facilitates clarity and linearity of learning.

BROWN STAIRS

Series of blocks in progression from 1 x 1 x 20 cm to 10 x 10 x 20 cm.

The series of prisms shows the child the first concepts of plane geometry, area and volume.

Code: MSE-0010

BOX WITH PRISMS FOR BROWN STAIRS

Box with 19 prisms of dimensions 1 x 1 x 20 cm, used to calculate and compare the volumes of the brown scale.

External box dimensions: 10 x 25 x 4.5h cm

Code: MSE-0011

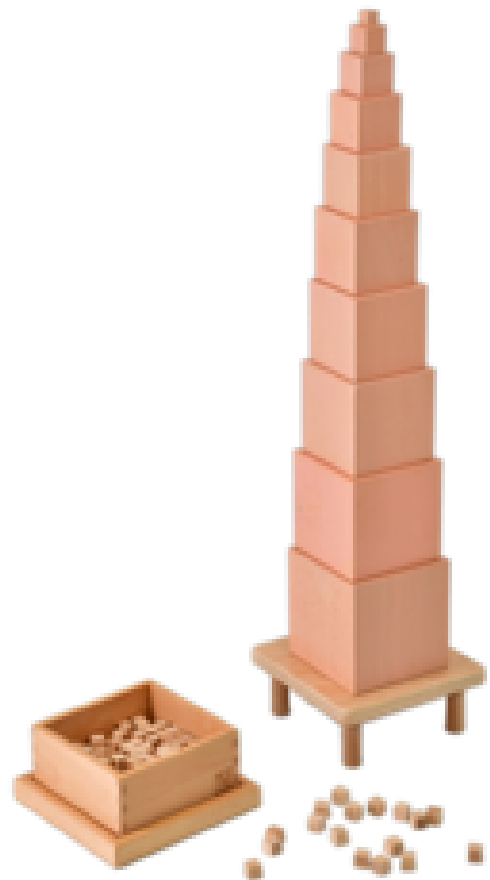

PINK TOWER

The tower is made up of cubes in progression from 1 x 1 x 1 cm to 10 x 10 x 10 cm of pale pink color like the originals of Maria Montessori.
Three additional 1 x 1 x 1 cm cubes are provided.

The series of cubes of the pink tower develops the perception of three-dimensionality, introduces the concept of large and small and brings the child closer to the decimal and geometric systems.

Code: MSE-0020

BOX WITH CUBES FOR PINK TOWER

Box with 273 cubes of 1 x 1 x 1 cm, useful for comparing the dimensions of the pink tower.

External box dimensions: 14 x 14 x 7h cm

Code: MSE-0021

PINK TOWER STAND

Pink tower support.

External box dimensions: 15 x 15 x 6.5h cm

SENSORIAL MATERIALS

CYLINDER BLOCK NO. 1

Series of cylinders in progression from large to small. The block introduces the child to a first distinction of dimensions.

Dimensions: 45 x 8 x 7h cm

Code: MSE-0031

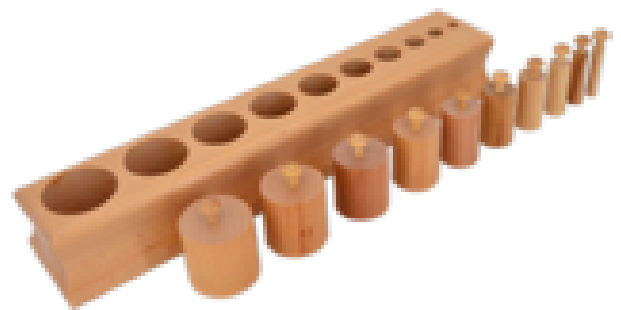

CYLINDER BLOCK NO. 2

Series of cylinders in progression in diameter, from the thickest to the finest. The block introduces the child to a first visual distinction of dimensions.

Dimensions: 45 x 8 x 7h cm

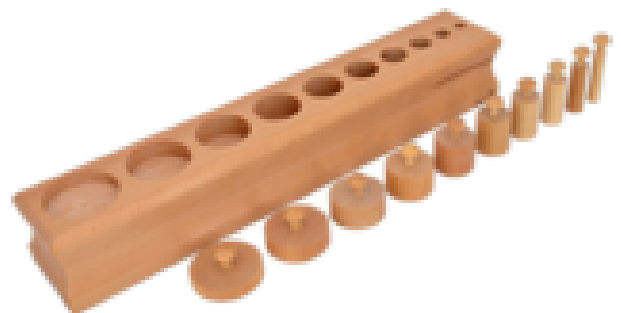

Code: MSE-0032

CYLINDER BLOCK NO. 3

Series of cylinders in progression. The height of the cylinders increases progressively while the diameter decreases from the lowest and widest to the highest and finest. The block introduces the child to a first distinction of dimensions by combining the concepts of diameter and height. Dimensions: 45 x 8 x 7h cm

Code: MSE-0033

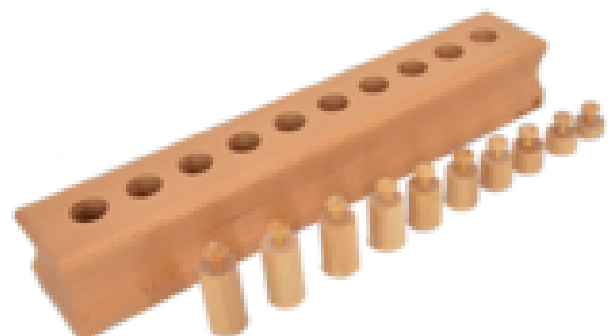

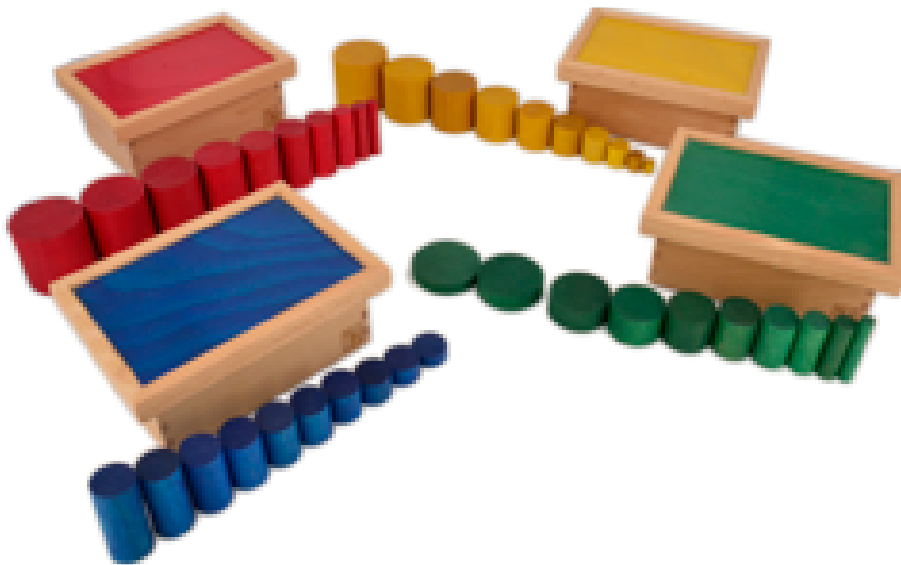

CYLINDER BLOCK NO. 4

Series of blocks of equal diameter and in progression of height, from high to low. The block introduces the child to a first visual distinction of dimensions.

Dimensions: 45 x 8 x 7h cm

Code: MSE-0034

KNOBLESS CYLINDERS

These series of cylinders reproduce the progressions already seen in the four blocks of cylinders.

Dimensions: 18 x 13 x 8h cm

Code: MSE-0040

BLUE RODS

Series of 10 rods measuring 3 x 3 cm and progressive length from 10 cm to 1 meter, blue in color.
The actions develop the discrimination of the concept of length.

Code: MSE-0050

RODS SUPPORT

Support for length and decimal rods.

Code: MSE-0051

SENSORIAL MATERIALS

ROUGH AND SMOOTH TOUCH TABLETS

Series of 3 rectangular wooden tablets with smooth and rough surface. The rough part, made of sandpaper, is embedded in the wood.

Dimensions: 25 x 13 cm

Code: MSE-0060

ROUGH GRADATION TABLETS

Series of 5 pairs of wooden tablets with different degrees of roughness. The rough part, made of sandpaper, is embedded in the wood. Each pair is color coded on the back of the tablet, for error checking. Including a box with 5 compartments. Tablet dimensions: 9 x 6 cm

Code: MSE-0061

COLOR TABLETS NO. 1

Box with lid containing 3 equal pairs of gradient in blue, yellow and red. Introduces the child to primary colors.

Dimensions: 10 x 10 x 6,5h cm

Code: MSE-0071

COLOR TABLETS NO. 2

Box with lid containing a series of 22 grades in equal pairs in the colors blue, yellow, red, green, orange, purple, brown, pink, white, black and gray. Introduces secondary and tertiary colors.

Dimensions: 27 x 10 x 6.5h cm

Code: MSE-0072

COLOR TABLETS NO. 3

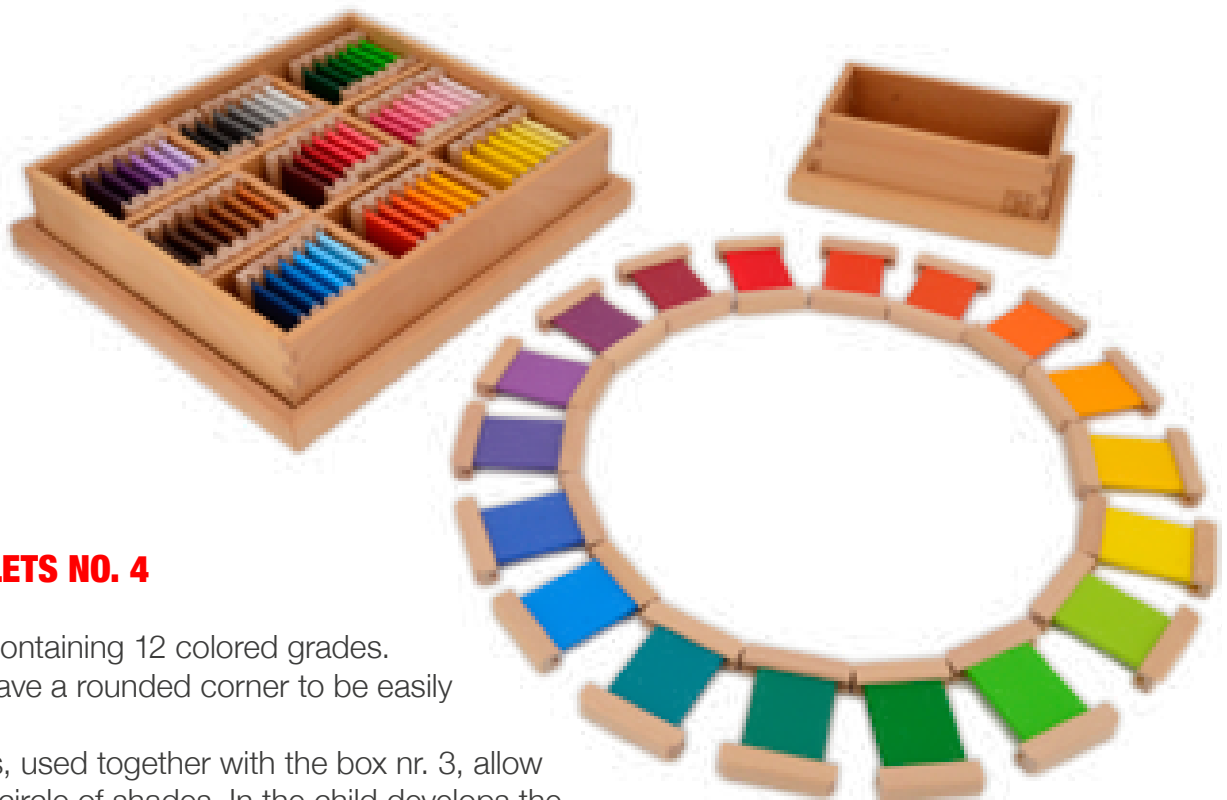

Lid box containing 63 grades in the nine colors blue, yellow, red, green, orange, purple, brown, pink and gray.

It introduces and develops the ability to discriminate color gradations.

Dimensions: 28 x 25 x 6.5h cm

Code: MSE-0073

COLOR TABLETS NO. 4

Box with lid containing 12 colored grades. The tablets have a rounded corner to be easily recognizable.

The 12 colors, used together with the box nr. 3, allow to obtain the circle of shades. In the child develops the ability to discriminate color similarities.

Dimensions: 17 x 10 x 6,5h cm

Code: MSE-0074

GEOMETRIC RED CABINET

Wooden cabinet with 7 drawers with red bottom including 1 presentation tray with wooden frame, containing a series of 39 geometric shapes. The shapes are equipped with a grip knob and are red.

Dimensions: 48.5 x 30 x 23.5h cm

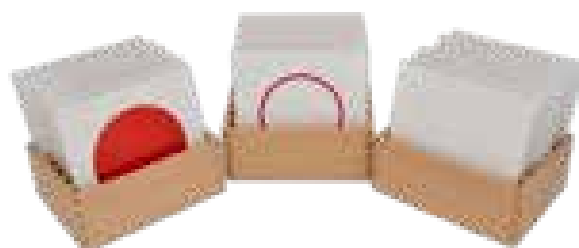

Code: MSE-0080

CARDS FOR GEOMETRIC CABINET

3 series of 36 cards of the flat figures, made of paper, one series represents the full figures, one the profile of the figures with a wide edge and one with a thin edge. The cards are presented in three wooden filing cabinets with six compartments, one for each drawer of the box. Cards 14x14 cm.

Code: MSE-0081

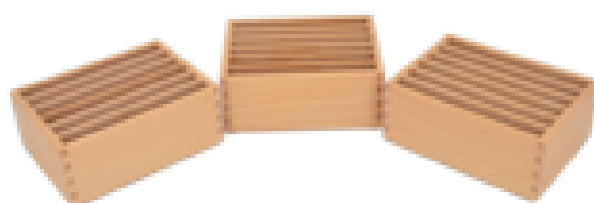

CARDS CABINETS FOR GEOMETRIC CABINET

Three wooden filing cabinets with six compartments, one for each drawer of the casket.

Dimensions: 16 x 12 x 7h cm

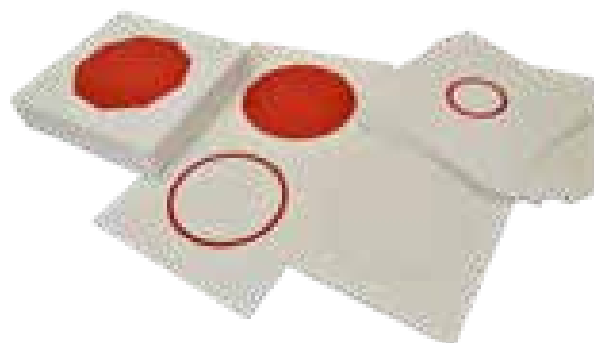

Code: MSE-0082

CARDS FOR GEOMETRIC CABINET

3 series of 36 cards 14x14 cm of the flat figures, made of paper, one series represents the full figures, one the profile of the figures with border.

Code: MSE-0083

SOUND CYLINDERS

2 boxes with 12 sound cylinders (6 red and 6 blue). Each box contains 6 cylinders identical in size and shape but with different contents in order to produce different sounds. Bottom of cylinders are marked for error checking .
External box size: 13.5 x 17.5 x 12.5h cm.

Code: MSE-0100

TRAY WITH BOWLS AND CHIPS

Transport tray with 4 wooden bowls, a box and 20 colored chips. It allows to develop and refine the precision grip (thumb index) as well as the pairing.

Dimensions: 22 x 17 x 3.5h cm

Code: MSE-0105

COLORLED BOWLS

4 wooden bowls, a box and 20 colored chips.

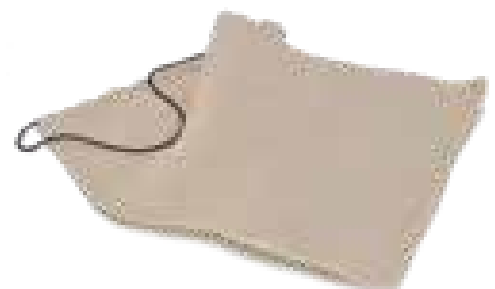

Code: MSE-0106

STEREOGNOSTIC MYSTERY BAG

Set of two bags with side openings for the development of the stereognostic sense. The child through touch works to recognize the shapes and objects inserted. The change of objects by the adult always makes discovery new and interesting.
Dimensions: 35 x 25 cm.

Code: MSE-0110

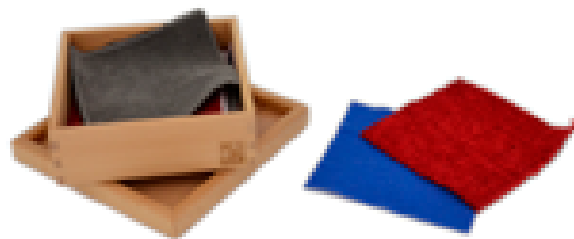

SENSORIAL MATERIALS

FABRICS BOX (COLORED)

Wooden box with 12 pairs of different fabrics in texture and colors. The blindfolded child works to recognize the difference to the touch of the various textures. The control of the error is given by the design or color of the fabrics.

Fabric size: 13 x 13 cm.

Code: MSE-0120

FABRICS BOX (WHITE)

Wooden box with 6 pairs of different fabrics in white weaving. The blindfolded child works to recognize the difference to the touch of the various textures, made more complicated by the absence of texture and coloring of the various fabrics.

Fabric size: 13 x 13 cm.

Code: MSE-0121

BARIC TABLETS

Beech wood box with baric tablets containing six identical pieces for three different types of wood. This material introduces and refines the sense of bareness in the child through the use of wooden tablets of different weights.

External dimensions: 8 x 23 x 5h cm.

Code: MSE-0140

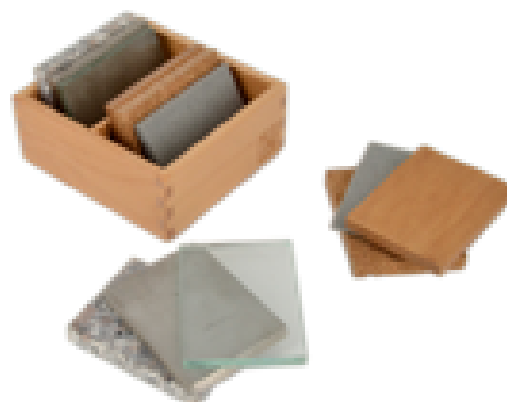

THERMIC TABLETS

Beech wood box containing six pairs of equal size for each of the six types of material: iron, marble, glass, wood, cork and felt. This material introduces and refines the thermal sense in the child through the use of tablets of different materials.

External dimensions: 12 x 11 x 5h cm.

Code: MSE-0141

GEOMETRIC SOLIDS COMPLETE WITH TRAY

10 blue colored wooden solids, three wooden supports and a tray engraved on the bottom to place the solids.

Wooden box containing 7 laminated cards 13x13 cm showing the base of the figures.

Code: MSE-0150

GEOMETRIC SOLIDS

10 blue colored wooden solids, with three wooden supports for the baseless solids.

Code: MSE-0151

CARDS FOR GEOMETRIC SOLIDS

Wooden box with lid and containing 7 laminated cards 13 x 13 cm showing the base of the figures.

Code: MSE-0152
